Preface	vii
1. INTRODUCTION	1
1.1 BACKGROUND	1
2. MOBILE AGENT SYSTEM	5
2.1 COMPONENTS OF A MOBILE AGENT SYSTEM	5
2.2 CHARACTERISTICS AND ADVANTAGES OF A MOBILE AGENT SYSTEM	6
3. ATTACKS AND COUNTERMEASURES OF SOFTWARE SYSTEM SECURITY	10
3.1 GENERAL SECURITY OBJECTIVES	11
3.2 TYPES OF ATTACKS	14
3.2.1 Attacks against availability	14
3.2.2 Attacks against confidentiality	15
3.2.3 Attacks against integrity	17
3.2.4 Attacks against miscellaneous security objectives	18
3.3 COUNTERMEASURES OF ATTACKS	19
3.3.1 Authentication	19
3.3.2 Access control	21
3.3.3 Audit and intrusion detection	26
3.3.4 Cryptography	28
3.3.5 Firewall	32
3.3.6 Anti-virus software	34
4. SECURITY ISSUES IN A MOBILE AGENT SYSTEM	37
4.1 SECURITY ISSUES IN A MOBILE AGENT SYSTEM	37
4.1.1 Possible attacks to a mobile agent system	37
4.1.1.1 Possible attacks to a mobile agent	37
4.1.1.2 Possible attacks to a mobile agent platform	40
4.1.2 Security requirements for a secure mobile agent system	41
4.2 RELATED WORKS	44

4.2.1	Existing mobile agent systems	44
4.2.2	Security research	51
4.2.2.1	Security measures for a mobile agent platform.....	53
4.2.2.2	Security measures for a mobile agent	56
4.2.3	Mobility modeling	59
4.2.4	Conclusions	61
5	A NEW FORMAL MODEL — EXTENDED ELEMENTARY OBJECT SYSTEM (EEOS).....	63
5.1	OBJECT-ORIENTED TECHNOLOGY AND PETRI NETS.....	64
5.2	ELEMENTARY OBJECT SYSTEM (EOS).....	65
5.3	EXTENDED ELEMENTARY OBJECT SYSTEM (EEOS).....	68
5.3.1	Requirements of a formal method for mobile agent system modeling.....	68
5.3.2	Extensions to Elementary Object System.....	70
5.3.2.1	Multiple system nets	70
5.3.2.2	Multiple layers.....	70
5.3.2.3	Token pool.....	71
5.3.2.4	Internal places, external places and internal transitions, external transitions	72
5.3.2.5	Two new arcs.....	74
5.3.2.6	Extended interaction relation	77
5.3.3	Formal specification of Extended Elementary Object System ..	78
6	A FORMAL FRAMEWORK OF A GENERIC SECURE MOBILE AGENT SYSTEM BASED ON EEOS.....	80
6.1	STRUCTURE OF A MOBILE AGENT SYSTEM	80
6.1.1	Mobile agent platform	82
6.1.1.1	Functionalities and components of a mobile agent platform ..	83
6.1.1.2	EEOS model of a mobile agent platform	84
6.1.2	Trust server.....	92
6.1.3	Mobile agent.....	98
6.1.3.1	Functionalities and components of a mobile agent	98
6.1.3.2	EEOS model.....	99
6.2	COMMUNICATION IN A MOBILE AGENT SYSTEM.....	104
6.2.1	Dynamic connection	104
6.2.2	Communications for a mobile agent platform and a mobile agent	107
6.2.2.1	Communication contents	107
6.2.2.2	Synchronous and asynchronous communications.....	109
6.3	MOBILITY IN A MOBILE AGENT SYSTEM.....	113
6.3.1	Strong mobility.....	113
6.3.2	Weak mobility	118
6.3.3	Discussion about weak mobility and strong mobility.....	119

6.4 SECURITY IN A MOBILE AGENT SYSTEM	121
6.4.1 Secure mobile agent transfer	122
6.4.1.1 Formalization of the secure mobile agent transfer	125
6.4.2 Mutual authentication between a mobile agent and a mobile agent platform.....	128
6.4.3 Authorization for a mobile agent from a mobile agent platform	131
6.4.3.1 Authorization expression method	131
6.4.3.2 Authorization policy	134
6.4.3.3 Authorization maintenance	138
6.4.4 Data security and action security	139
6.4.4.1 Data security.....	140
6.4.4.2 Action security.....	141
7 TRANSLATING THE EEOS MODEL TO COLORED PETRI NET MODEL	146
7.1 OBJECT NET TOKENS AND SPECIAL TOKENS	147
7.1.1 Object net tokens	147
7.1.2 Special tokens.....	149
7.2 DYNAMIC CONNECTION	150
7.3 NEW CONSTRUCTS – TWO NEW ARCS AND EXTENDED INTERACTION RELATION	152
7.3.1 Two new arcs.....	152
7.3.2 Extended interaction relation.....	152
7.4 COMPLICATED COMMUNICATION	153
8 SIMULATION AND ANALYSIS OF THE EXTENDED ELEMENTARY OBJECT SYSTEM MODEL OF A SECURE MOBILE AGENT SYSTEM.....	155
8.1 REACHABILITY.....	159
8.2 BOUNDEDNESS.....	159
8.3 LIVENESS	161
8.4 CONCURRENCY	161
8.5 SECURITY.....	162
9 A CASE STUDY IN ELECTRONIC COMMERCE.....	166
9.1 CASE SCENARIO.....	166
9.2 EEOS MODEL.....	166
9.3 SYNCHRONOUS FIRING MECHANISM IN THE CASE STUDY	168
9.4 DESIGN/CPN MODEL AND EXPERIMENT RESULTS.....	170
10 A CASE STUDY IN E-AUCTION SYSTEM.....	174
10.1 CASE SCENARIO	174
10.1.1 ABEAS - agent based e-auctioning system.....	174

10.1.1.1 The agents in ABEAS	176
10.1.1.2 The agent platform in ABEAS	176
10.1.1.3 Security issues in the ABEAS	177
10.1.2 Modeling requirements of ABEAS	177
10.2 EEOS MODEL	178
10.2.1 The e-broker agent	178
10.2.2 The modified trust server	179
11 CONCLUSION	181
BIBLIOGRAPHY	183
INDEX	199
