<i>Preface</i>	vii
<i>Notation</i>	xv
1. Brownian Motions and Stochastic Integrals	1
1.1 Introduction	1
1.2 Probability Theory	4
1.3 Stochastic Processes	12
1.4 Brownian Motions	18
1.5 Stochastic Integrals	23
1.6 Itô's Formula	38
1.7 Markov Processes	43
1.8 Generalised Itô's Formula	47
1.9 Exercises	49
2. Inequalities	51
2.1 Introduction	51
2.2 Frequently Used Inequalities	51
2.3 Gronwall-Type Inequalities	54
2.4 Matrices and Inequalities	58
2.5 Linear Matrix Inequalities	62
2.6 M-Matrix Inequalities	67
2.7 Stochastic Inequalities	69
2.8 Exercises	75
3. Stochastic Differential Equations with Markovian Switching	77

3.1	Introduction	77
3.2	Stochastic Differential Equations	77
3.3	Existence and Uniqueness of Solutions	81
3.4	SDEs with Markovian Switching	88
3.5	L^p -Estimates	96
3.6	Almost Surely Asymptotic Estimates	101
3.7	Solutions as Markov Processes	104
3.8	Exercises	110
4.	Approximate Solutions	111
4.1	Introduction	111
4.2	Euler–Maruyama’s Approximations	111
4.2.1	Global Lipschitz Case	114
4.2.2	Local Lipschitz Case	118
4.2.3	More on Local Lipschitz Case	121
4.3	Caratheodory’s Approximations	126
4.4	Split-Step Backward Euler Scheme	134
4.5	Backward Euler Scheme	146
4.6	Stochastic Theta Method	149
4.7	Exercises	154
5.	Boundedness and Stability	155
5.1	Introduction	155
5.2	Asymptotic Boundedness	157
5.3	Exponential Stability	164
5.3.1	Nonlinear Jump Systems	178
5.3.2	Multi-Dimensional Linear Equations	180
5.3.3	Scalar Linear Equations	182
5.3.4	Examples	187
5.4	Moment and Almost Sure Asymptotic Stability	191
5.5	Stability in Probability	204
5.6	Asymptotic Stability in Distribution	210
5.7	Exercises	226
6.	Numerical Methods for Asymptotic Properties	229
6.1	Introduction	229
6.2	Euler–Maruyama’s Method and Exponential Stability	230
6.3	Euler–Maruyama’s Method and Lyapunov Exponents	239

6.4	Generalised Results and Stochastic Theta Method	241
6.5	Asymptotic Stability in Distribution of the EM Method: Constant Step Size	249
6.5.1	Stability in Distribution of the EM Method	249
6.5.2	Sufficient Criteria for Assumptions 6.16–6.18	256
6.5.3	Convergence of Stationary Distributions	265
6.6	Asymptotic Stability in Distribution of the EM Method: Variable Step Sizes	267
6.7	Exercises	270
7.	Stochastic Differential Delay Equations with Markovian Switching	271
7.1	Introduction	271
7.2	Stochastic Differential Delay Equations	273
7.3	SDDEs with Markovian Switching	277
7.4	Moment Properties	282
7.5	Asymptotic Boundedness	285
7.6	Exponential Stability	289
7.7	Approximate Solutions	294
7.8	Exercises	300
8.	Stochastic Functional Differential Equations with Marko- vian Switching	301
8.1	Introduction	301
8.2	Stochastic Functional Differential Equations	301
8.3	SFDEs with Markovian Switching	303
8.4	Boundedness	305
8.5	Asymptotic Stability	308
8.6	Razumikhin-Type Theorems on Stability	311
8.7	Examples	314
8.8	Exercises	317
9.	Stochastic Interval Systems with Markovian Switching	319
9.1	Introduction	319
9.2	Interval Matrices	320
9.3	SDISs with Markovian Switching	322
9.4	Razumikhin Technology on SDISs	328
9.4.1	Delay Independent Criteria	328
9.4.2	Delay Dependent Criteria	334

9.4.3	Examples	341
9.5	SISs with Markovian Switching	346
9.6	Exercises	349
10.	Applications	351
10.1	Introduction	351
10.2	Stochastic Population Dynamics	351
10.2.1	Global Positive Solutions	353
10.2.2	Ultimate Boundedness	356
10.2.3	Moment Average in Time	358
10.3	Stochastic Financial Modelling	360
10.3.1	Non-Negative Solutions	361
10.3.2	The EM Approximations	363
10.3.3	Stochastic Volatility Model	370
10.3.4	Options Under Stochastic Volatility	375
10.4	Stochastic Stabilisation and Destabilisation	379
10.5	Stochastic Neural Networks	387
10.6	Exercises	394
	<i>Bibliographical Notes</i>	395
	<i>Bibliography</i>	397
	<i>Index</i>	407
