

CONTENTS

1. Introduction	1
2. Robotic Vehicles	11
2.1 Introduction	11
2.1.1 What are robotic vehicles?	11
2.1.2 Why are robotic vehicles important?	12
2.1.3 How do robotic vehicles work? What are the key technologies for mobility?	15
2.2 Research Challenges	18
2.2.1 Mechanisms and mobility	18
2.2.2 Power and propulsion	19
2.2.3 Computation and control	19
2.2.4 Sensors and navigation	22
2.3 International Survey	24
2.3.1 Research on robotic vehicles — the United States .	24
2.3.1.1 Military and defense systems	24
2.3.1.2 Space robotic vehicles	24
2.3.1.3 Field robotics	26
2.3.1.4 Undersea robotics	26
2.3.1.5 Search-and-rescue robotics	27
2.3.2 Research on robotic vehicles — Japan and South Korea	27
2.3.2.1 Personal and service robotic vehicles . . .	29
2.3.2.2 Biomimetic mobility	29
2.3.2.3 Undersea robotics	30

2.3.3	Research on robotic vehicles — Europe	30
2.3.3.1	Navigation and architectures	32
2.3.3.2	Transportation systems	33
2.3.3.3	Personal and service robotics	33
2.3.3.4	Undersea robotics	35
2.4	Comparative Review of Programs	35
2.5	Further Readings	37
3.	Space Robotics	39
3.1	What is Space Robotics?	39
3.2	Issues in Space Robotics	41
3.2.1	How are Space Robots created and used? What technology for space robotics needs to be developed?	41
3.3	International Efforts in Space Robotics	55
3.4	The State of the Art in Space Robotics	63
	References	68
4.	Humanoids	69
4.1	Background	69
4.2	Definitions of the Humanoid System	70
4.2.1	Form and function	70
4.2.2	How are humanoids built?	71
4.3	Current Challenges in Humanoids	71
4.3.1	Design, packaging, and power	71
4.3.2	Bipedal walking	73
4.3.3	Wheeled lower bodies	75
4.3.4	Dexterous limbs	76
4.3.5	Mobile manipulation	78
4.3.6	Human–robot interaction	78
4.4	Key Technologies	80
4.5	Fundamental Research Challenges	81
4.6	Regions Visited by the Assessment Team	81
4.7	Observations, Applications, and Conclusions	81
4.7.1	Quantitative observations	81
4.7.2	Qualitative observations	85
4.7.3	Applications	86
4.8	Conclusions	86
	References	87

5. Industrial, Personal, and Service Robots	89
5.1 Introduction	89
5.2 Market Analysis and Trends	91
5.3 State of the Art in Theory and Practice	92
5.4 International Assessment	94
5.4.1 United States	94
5.4.2 Europe	95
5.4.3 Japan and Korea	95
5.4.4 Australia	96
5.5 International Comparisons	97
5.5.1 Relative strengths	97
5.5.2 Qualitative observations	99
5.6 Future Challenges	100
References	101
6. Robotics for Biological and Medical Applications	103
6.1 Background	103
6.2 Why Robots and Automation in Biology and Medicine	103
6.2.1 Biological applications	103
6.2.2 Medical applications	104
6.2.3 Robotic tools, devices, and systems	106
6.2.4 Key technologies	107
6.2.5 Fundamental research challenges	109
6.3 Regions Visited by the Assessment Team	110
6.3.1 United States	110
6.3.2 Japan and Korea	111
6.3.3 Europe	111
6.4 Quantitative and Qualitative Observations	115
6.4.1 Quantitative observations	115
6.4.2 Qualitative observations	115
6.5 Conclusions	116
References	117
7. Networked Robots	119
7.1 Introduction	119
7.2 Significance and Potential	122
7.3 State of the Art in Theory and Practice	124
7.4 Scientific and Technical Challenges	127

7.5	International Comparisons	128
7.6	Future Challenges	128
	References	129
	Authors' Biographies	131
	Index	139
