Chapter 1	Dengue: Overview and History	1
	<i>Scott B. Halstead</i>	
	Host Range	1
	Geographical Distribution	3
	Disease Burden and Cost	4
	History	9
Chapter 2	The Infectious Agent	29
	<i>David W. C. Beasley and Alan D. T. Barrett</i>	
	Classification	29
	Virion Structure and Morphology	31
	Immune Response Induced by Dengue Viruses	34
	Proteins Encoded by the Virus	34
	Replication Strategy	49
	Conclusions	57
Chapter 3	Epidemiology	75
	<i>Scott B. Halstead</i>	
	Introduction	75

	Ecology of Vector Mosquitoes	75
	Infectious Disease Epidemiology of <i>Aedes aegypti</i> -Borne Dengue	91
	Sylvatic Cycle of Dengue Transmission	110
Chapter 4	Resistance to Infection	123
	<i>David W. Vaughn, LTC John M. Scherer and Wellington Sun</i>	
	Introduction	123
	Innate Immunity	123
	Antibody Responses in Natural Infection	127
	Vaccine Development	132
	Conclusion	149
Chapter 5	Clinical Features of Dengue	171
	<i>Jeremy Farrar</i>	
	Introduction	171
	Classification Schemes	172
	Clinical Features	172
	Differential Diagnosis	177
	Specific Issues	178
Chapter 6	Management of Dengue	193
	<i>Bridget Wills</i>	
	Introduction	193
	Management	200
	Conclusions	214
Chapter 7	Pathogenesis: Risk Factors Prior to Infection	219
	<i>Scott B. Halstead</i>	
	Introduction	219
	Host Factors	220
	Viral Factors	240
	Discussion	244

Chapter 8	Elimination of Infection	257
	<i>Alan L. Rothman and Francis A. Ennis</i>	
	Introduction	257
	Innate and Adaptive Cellular Immune Responses	257
	Interferons	259
	Natural Killer Cells	262
	T Lymphocytes	263
	Naturally Acquired versus Vaccine-Induced Cellular Immunity	273
	Summary	276
Chapter 9	Pathophysiology	285
	<i>Scott B. Halstead</i>	
	Introduction	285
	Dengue Infection Model	286
	Immunopathogenesis	288
	Models of Dengue Pathophysiology	306
Chapter 10	Diagnosis of Dengue Virus Infections	327
	<i>Timothy P. Endy, Ananda Nisalak and David W. Vaughn</i>	
	Introduction	327
	Antibody and Virus Patterns in Dengue Virus Infection	328
	Diagnostic Pathway in Patients with Suspected Acute Dengue	330
	Serological Assays	331
	Virus Isolation and Serotype Identification	343
	Immunohistochemistry	346
	Genome-Based Assays	347
	Future Directions	349

Chapter 11	The Control of Dengue Vectors	361
	<i>Norman G. Gratz and Scott B. Halstead</i>	
	Introduction	361
	Existing Control Methods; Control of the Aquatic Stages	363
	The Environmental Control of <i>Ae. aegypti</i> Larval Habitats	363
	Larvicides Used for the Control of <i>Ae. aegypti</i>	367
	The Biological Control of <i>Ae. aegypti</i> Larvae	369
	The Use of Fish Predators Against <i>Ae. aegypti</i> Larvae	369
	Predaceous Mosquito Larvae for the Control of <i>Ae. aegypti</i>	370
	The Use of Copepod Predators	370
	The Use of Bti	371
	Conclusions on the Feasibility of Larval Control	372
	Adulticidal Control of <i>Ae. aegypti</i>	373
	Space Spray Adulticiding for Control of <i>Ae. aegypti</i> ; The Use of Thermal Fogs	374
	Space Spray Adulticiding for Control of <i>Ae. aegypti</i> ; The Use of ULV	374
	Conclusions: What Are the Options?	377
Chapter 12	Biological Control of Dengue Vectors: Promises from the Past	389
	<i>Brian H. Kay</i>	
Chapter 13	Mosquito Control: Behavioral and Community Interventions	407
	<i>Peter Winch, Elli Leontsini and Linda S. Lloyd</i>	
	Conventional Approaches to Behavior Change Interventions	408
	The Emerging Paradigm for Behavioral Interventions	411

	Role of the Community	416
	Conclusions	418
Chapter 14	Controversies	425
	<i>Jose Rigau-Perez, Scott B. Halstead and David M. Morens</i>	
	I. The World Health Organization Definition of Dengue Hemorrhagic Fever is Inadequate for Clinical and Epidemiological Purposes	427
	Pro: <i>José G. Rigau-Pérez</i>	
	Con: <i>Scott B. Halstead</i>	431
	II. The Association Between Dengue Hemorrhagic Fever and Second Dengue Infections is Simply Coincidental	436
	Pro: <i>David M. Morens</i>	
	Con: <i>Scott B. Halstead</i>	440
	III. Dengue Hemorrhagic Fever is Caused by Virulent Dengue Viruses	447
	Pro: <i>David M. Morens</i>	
	Con: <i>Scott B. Halstead</i>	453
	IV. Dengue Hemorrhagic Fever is Caused by an Abnormal or Accelerated T Cell Response to Infection	462
	Pro: <i>David M. Morens</i>	
	Con: <i>Scott B. Halstead</i>	465
	V. Dengue Hemorrhagic Fever is Caused by Autoimmune Phenomena Triggered by a Dengue Viral Infection	469
	Pro: <i>David M. Morens</i>	
	Con: <i>Scott B. Halstead</i>	472
