

CONTENTS

Foreword	v
RECOMB Regulatory Genomics 2006 Organization	vii
Keynote Papers	
Computational Prediction of Regulatory Elements by Comparative Sequence Analysis <i>M. Tompa</i>	3
A Tale of Two Topics — Motif Significance and Sensitivity of Spaced Seeds <i>M. Li</i>	4
Computational Challenges for Top-Down Modeling and Simulation of Biological Pathways <i>S. Miyano</i>	5
An Improved Gibbs Sampling Method for Motif Discovery via Sequence Weighting <i>T. Jiang</i>	6
Discovering Motifs with Transcription Factor Domain Knowledge <i>F. Chin</i>	7
Applications of ILP in Computational Biology <i>A. Dress</i>	8
On the Evolution of Transcription Regulation Networks <i>R. Shamir</i>	9
Systems Pharmacology in Cancer Therapeutics: Iterative Informatics-Experimental Interface <i>E. Liu</i>	10
Computational Structural Proteomics and Inhibitor Discovery <i>R. Abagyan</i>	11

Characterization of Transcriptional Responses to Environmental Stress by Differential Location Analysis <i>H. Tang</i>	12
A Knowledge-based Hybrid Algorithm for Protein Secondary Structure Prediction <i>W. L. Hsu</i>	13
Monotony and Surprise (Conservative Approaches to Pattern Discovery) <i>A. Apostolico</i>	14
Evolution of Bacterial Regulatory Systems <i>M. S. Gelfand</i>	15
Contributed Papers	
TScan: A Two-step <i>De Novo</i> Motif Discovery Method <i>O. Abul, G. K. Sandve, and F. Drabløs</i>	19
Redundancy Elimination in Motif Discovery Algorithms <i>H. Leung and F. Chin</i>	31
GAMOT: An Efficient Genetic Algorithm for Finding Challenging Motifs in DNA Sequences <i>N. Karaoglu, S. Maurer-Stroh, and B. Manderick</i>	43
Identification of Spaced Regulatory Sites via Submotif Modeling <i>E. Wijaya and R. Kanagasabai</i>	57
Refining Motif Finders with <i>E</i> -value Calculations <i>N. Nagarajan, P. Ng, and U. Keich</i>	73
Multiple Indexing Sequence Alignment for Group Feature Identification <i>W.-Y. Chou, T.-W. Pai, J. Z.-C. Lai, W.-S. Tzou, M. D.-T. Chang, H.-T. Chang, W.-Y. Chou, and T.-C. Fan</i>	85
Improving the Accuracy of Signal Transduction Pathway Construction Using Level-2 Neighbours <i>T. K. F. Wong, S. M. Yiu, T. W. Lam, and S. C. K. Wong</i>	99
Investigating Roles of DNA Flexibility in Promoter Recognition and Regulation <i>J. D. Bashford</i>	109

Regulatory Networks of Genes Affected By MorA, A Global Regulator Containing GGDEF and EAL Domains in <i>Pseudomonas Aeruginosa</i>	123
<i>W.-K. Choy, V. B. Bajic, M.-W. Heng, M. Veronika, and S. Swarup</i>	
Author Index	131
