

CONTENTS

<i>Abstracts</i>	xiii
<i>Foreword</i> (by Thomas H. Murray)	xxix
Contested Cells: Global Perspectives on the Stem Cell Debate — A Critical Introduction	1
<i>Benjamin Capps and Alastair V. Campbell</i>	
Introduction: The Source of Controversy	1
Part One — Contested Cells: Understanding the Ethical Controversy	4
Part Two — Global Perspectives	29
Closing Remarks	52
Part One Contested Cells: Understanding the Ethical Controversy	55
(a) The Problems of Regulation	55
1. A Case Study of Experimental Stem Cell Therapy and the Risks of Over-Regulation	57
<i>Anthony Hollander</i>	

2.	Stem Cell Technology: From Research Regulation to Clinical Applications	63
	<i>Donald Chalmers</i>	
	Introduction	63
	The Derivation of Stem Cells and the Current Science	65
	Regulation of Stem Cell Research	72
	Towards the Clinical Use of Stem Cell Technology	82
	Conclusions	92
	Acknowledgements	93
3.	Legal Imperialism in the Regulation of Stem Cell Research and Therapy: The Problem of Extraterritorial Jurisdiction	95
	<i>Daniela Cutas and Christian Munthe</i>	
	Introduction	95
	The Vision of Global Regulation of ES Cell Research	98
	Research and Researchers	101
	Clinicians	106
	Patients	109
	Concluding Discussion	116
	Postscript	119
4.	Governing Cloning: United Nations' Debates and the Institutional Context of Standards	121
	<i>W. Calvin Ho</i>	
	Cloning and the United Nations	124
	Stem Cells, Cloning and the Bioethics Committee of Singapore	132
	Domestic and Institutional Responses in the UK	135
	Some Observations	146
	Conclusion	152

(b) The Enduring Ethical Debate	155
5. Sociological Reflections on Ethics, Embryonic Stem Cells and Translational Research	157
<i>Claire Williams and Steven Wainwright</i>	
Sociology and Bioethics	157
Empirical Ethics: Embryonic Stem Cells and Translational Research	159
Translational Research, Hybrid Embryos and Experimental Neuroscience	172
Towards Multidisciplinary Translational Ethics?	184
Acknowledgements	188
6. Rhetoric, Power and Legitimacy in Public Discourse: A Critical Analysis of the Public Debate Surrounding the Review of Embryo Research and Cloning Legislation in Australia in 2005	189
<i>Tamra Lysaght and Ian Kerridge</i>	
Introduction	189
Contested Notions of Science	193
Rhetoric, Power and Legitimacy	195
Conclusion	201
7. New Developments in Stem Cell Science: iPS Cells and the Challenge to Consent	207
<i>Jonathan Mackenney and Benjamin Capps</i>	
Introduction	207
The Perpetuation of a Great Mistake: Immortals in Research	210
Reappraising Consent: Where's the Harm in iPS Cell Science?	221
Conclusion	239
Acknowledgements	240

8.	‘Reasonable Suffering’: The Application of Stem Cell Technologies to Non-Human Animals	241
	<i>James Yeates</i>	
	Introduction	241
	The Contexts	243
	The Legal Status Quo	248
	Unfairness	256
	A Proposed Solution: Rawls and Fairness	258
	Application to SCTs in the Veterinary Context	271
	Application to Applied Stem Cell Research in Laboratory Context	275
9.	Ontological Status of Human–Non-Human Embryonic Chimeras	279
	<i>Josef Kuře</i>	
	Introduction: From the Mythological Chimera, to the Chimera in Biomedical Research	279
	Chimerism and Semantics: Problems With Terminology and Definitions	293
	Human–Non-Human Embryonic Chimeras: Demarcation of the Semantic Scope	303
	Chimera Ontological Status	317
	Conclusions	318
10.	Religion, Civic Virtue and the Stem Cell Debate	321
	<i>Teoh Chin Leong</i>	
	Introduction	321
	Setting the Context: Substantive and Procedural Ethics	322
	The Cultivation of an Ethic of Citizenship	324
	Three Principles of Civic Virtue	325
	An Institutional Ethics of Citizenship	333
	Five Objections	334

Procedural Virtues in Public Ethical Discourse	339
Religion and the Cultivation of Exploratory Openness	341
Civic Virtue and the Stem Cell Debate	344
Conclusion	356
Acknowledgements	356
Part Two Global Perspectives	357
11. Rejuvenated Federalism: State-Based Stem Cell Research Policy	359
<i>Geoffrey Lomax</i>	
Introduction	359
Sovereign Action and Social Controversy	361
Social Controversy and Administrative Legitimacy	362
Procedural Frameworks and Legitimacy	363
Developing Normative Ethical Standards for Research	364
State-State Interactions in Policy Development	366
Stem Cell Science and Federalism	368
Critiques of a State-Based Approach	371
Plurality and Levels of Engagement	371
The Emergence of Federal Stem Cell Policy	373
The Pathway Towards Clinical Application	374
Conclusion	375
12. Hybrid Embryos — Ethics, Law and Rhetoric in the United Kingdom's Stem Cell Policy	377
<i>Natasha Hammond-Browning and Søren Holm</i>	
Hybrids and the HFEA	379
Debate	382
Derivation of Stem Cells from Hybrid Embryos	387
The Future of Hybrids in Clinical Medicine	391
Conclusion	393

13.	Stem Cell Research and Its Clinical Application in China: Interactions Between Science, Ethics and Society	395
	<i>Renzong Qiu and Xiaomei Zhai</i>	
	Introduction	395
	Stem Cell Research in China's Social Environment	396
	Stem Cell Research and Chinese Culture	398
	Awareness of Patients' and Human Subjects' Rights	404
	Regulatory Gaps and Challenges	409
	Clinical Application of Stem Cell Products:	416
	The Concerns of Under Regulation	
	Conclusion: Hope for Future Regulation	418
	List of Chinese Laws and Regulations	419
14.	Neither a 'Person' Nor a 'Thing': The Controversy Concerning the Moral and Legal Status of Human Embryos in Japan	421
	<i>Satoshi Kodama and Akira Akabayashi</i>	
	Introduction: Neither a 'Person' Nor a 'Thing'	421
	The Bioethics Committee of the Council for Science and Technology	422
	Committee Discussions Regarding the Regulation of Human Cloning	425
	Human Embryo Research	430
	Life Sciences and Bioethics: Checks <i>or</i> Balances?	434
	Conclusion	437
	Acknowledgements	439
15.	A Tale of Two Countries: Czech and Slovak Stem Cell Biopolicies	441
	<i>Peter Sýkora</i>	
	Introduction	441
	Historical and Cultural Context	443

Legislation	444
Searching for Reasons	457
Conclusion	475
Acknowledgements	477

<i>Index</i>	479
