Preface	xi
Acknowledgements	xvii
Chapter 1. Physics of the Universe	1
Introduction	1
Is Newton's Theory an Explanation of Gravity?	4
The Expanding Universe	5
The Oscillating Universe Cosmology	6
The Theory of General Relativity	7
The Role of Space and Time	8
Geometry and Matter	11
Generalization of Einstein's Field Equations	13
A Unified Field Theory	16
Chapter 2. A Language of Cosmology: The Mathematical Basis of General Relativity	18
Introduction	18
Einstein's Tensor Formulation	19
The Riemann Curvature Tensor	19
The Geodesic Equation	21

The Vacuum Equation	21
<i>The Schwarzschild Solution</i>	22
<i>The black hole</i>	23
The Crucial Tests of General Relativity	24
The Logic of the Spacetime Language	25
Chapter 3. A Unified Field Theory in General Relativity: Extension from the Tensor to the Quaternion Language	27
Introduction	27
Factorization of Einstein's Tensor Field Equations	28
The Riemann Curvature Tensor in Quaternion Form	29
<i>Spin-affine connection</i>	30
<i>Spin curvature</i>	31
The Quaternion Metrical Field Equations	32
A Symmetric Tensor-Antisymmetric Tensor Representation of General Relativity — Gravity and Electromagnetism	32
The Einstein Field Equations from the Symmetric Tensor Part	33
The Maxwell Field Equations from the Antisymmetric Tensor Part	33
Conclusions	35
Chapter 4. An Oscillating, Spiral Universe Cosmology	37
Introduction	37
<i>The oscillating universe cosmology</i>	39
<i>Equations of motion in general relativity</i>	39

Dynamics of the Expansion and Contraction of the Universe	41
<i>The geodesic equation in quaternion form</i>	41
Dynamics of the Oscillating Universe Cosmology	44
Derivation of the Hubble Law as an Approximation	46
The Spiral Structure of the Universe	46
Concluding Remarks	49
Chapter 5. Dark Matter	51
Introduction	51
The Field Equations and the Ground State Solution for the Bound Particle-Antiparticle Pair	53
Separation of Matter and Antimatter in the Universe	56
Olber's Paradox	57
Chapter 6. Concluding Remarks	60
Black Holes	60
Pulsars	61
On the Human Race and Cosmology	62
Chapter 7. Philosophical Considerations	64
On Truth	64
Positivism versus Realism, Subjectivity versus Objectivity	67
On Mach's Influence in Physics and Cosmology	70
<i>The quantum mechanical limit</i>	70
<i>The Mach principle</i>	71
<i>The Mach principle and a unified field theory</i>	72

References and Notes	74
Postscript	77
Physics in the 21st Century	78
Holism	95
The Universe	99
The Mach Principle and the Origin of Inertia from General Relativity	108
Index	125
